

Mentorship is one of the most precious gifts that we can bestow on young people because it allows them to leverage other people's experiences, which in turn accelerates their journey towards success.

The young adults in the Great Start Initiative will learn to master Vision Mapping, which is one of the single most effective strategies for setting and achieving their life goals.

The Vision Mapping process will enable your members to achieve goals and dreams that they may not have believed possible before in their lives!

First Pillar of the Program:  
**Vision Mapping**
